

# MAASTRICHT BASKETBALL HOLDINGS LTD

Press statement  
5<sup>th</sup> April 2024

The Maastricht Basketball Holdings Ltd (MBH) and its associated rebels team, would like to take this opportunity to release a short press statement to the current events that have been evolving in the media over the last 8-12 weeks in the trow and the Limburger.

MBH and its associated partners, representatives, cooperation's and stake holders have been the recipients of local and national press attention recently. In order to completely be able to handle and give a complete and thorough statement on the matter, MBH has stayed silent and patient out of respect and integrity in regards to its press statements, in order to give time for the MBH stake holders, cooperation's and partners to create independent reviews, audits and investigations to the allegations and biased reporting that has been in the press recently. Thus allowing others to confirm that there is no justification to the stories and articles in the press.

Some of the stake holders, cooperation's have confirmed and performed independent reviews and audits, and have released their statements and findings publicly, informing that there has been no wrongdoings or unjust acts performed by MBH that we know of, either financially, legally or criminally.

To this fact, it now allows us to communicate our position, our thoughts and comments on the articles and to now prove factually that the reporting has been excessively suggestive, without providing factual information in print.

To this end, we will be consulting our media advisors, legal team and will include our partners, stakeholders and cooperation's information, reviews, investigative research to provide a complete picture of events.

We will be focusing on the non factual applications that have been written about MBH, its partners, officers, personnel or cooperation's, to the point that we will actively seek compensation, defamation of character, loss of resources or goodwill, reparations, false reporting or creative journalism and other financial restitution from parties who have either provided false information, disseminated information without permission, broken articles of contracts, divulged private and sensitive information or simply false testimony.

In the coming weeks we will be releasing more information and press statements to verify our stance and position. We would like to thank all the people and companies who have stood by us in the very difficult and stressful period.
